

PRODUCT AND SERVICE DESCRIPTION

The Concept of the Sentinel® EDC

The Sentinel® EDC Anglehead Flashlight is a concept of Centurio Design® and is the connection between the EDC/Law -Enforcement and Military market. We brought back the anglehead design of the "TL-194 military jungle flashlight" and introduced some of those features into the Sentinel® EDC.

The clip is able to be used with MOLLE webbing for secured hands-free attachment on MOLLE vests and compatible equipment. The top-positioned button enables operation without removing from the vest or webbing gear. We have added many new features in this Sentinel® EDC over the old version and various updates from our new technology.

We have remained loyal to our classic "Lightning Less-Lethal Weapons® (LLLW®)" line and connect luminosity and self-defense in a flashlight which can be used by law-enforcement or private security officers or Military and Tactical and Survival Specialists and also law-abiding citizens who like to own and to carry legal a self-defense device. It's anglehead design provides personal illumination anywhere, anytime simply with a push of its top-positioned button, now updated with our exclusive strobe and BlueZeus® technology.

More at our website CenturioDesign.com under "RESOURCES" you will find a new quantitative of information.

Under "COMPANY" you will find our Frequently Asked Questions, FAQ or shortly FAQs, a compilation of frequently asked or most frequently asked questions and the corresponding answers. Centurio Design® been right out of the training business and train only so-called "Master Instructor" who works and operating independently and like to train customers on our products and techniques.

ABOUT US, BRANDS AND CONTACT US

Centurio Design®, the light system specialist from Muenster (Münster) / Germany focus of outdoor / action sports and law enforcement light. Centurio Design® is always working in other ways than other companies or competitors. Usually, companies go from the civilian sector into the law enforcement- or defense market. In our case, Centurio Design® is exactly the opposite. Centurio Design® has managed to place its quality products in various civilian markets, such as in motor sports, outdoor sports and martial arts. In all three areas, we have begun to rebuild existing products or have developed new products for these markets.

Why did we choose the name Centurio? We searched for a name which reflects the origin and meaning of our company. A Centurio was a rank in the ancient Roman Army. This army was known for its forward planning, including its attention to detail, related to strategy and organization. We chose our name to reflect this ideal. We are extremely proud of the name because we feel it encompasses the spirit of Europe within our Company. We, as a European based Company, embrace the lifestyle of the European Union. We have Company members from other areas of the world as we expand to encompass many nations and all new members accept and adopt to the E.U. ideals we strive to maintain.

OPERATOR'S MANUAL SENTINEL® EDC

Manual ID: S-EDC-03-16 (ENGL)

The Flashlight is made of high quality Aircraft Aluminum, anyway you must serviced then from time to time. Please always use the following information's.

BATTERY REPLACEMENT

Unscrew the tailcap and insert new batteries with positive ends towards LED head assembly. Replace tailcap and hand tighten. Press tailcap pushbutton switch to test. Note: If batteries are inserted with positive ends towards the tailcap, the unit will not light. Damage will not occur. Reinsert batteries with positive ends towards the LED assembly.

WARNING

Lithium batteries can explode or cause burns if disassembled, shorted, recharged, exposed to water, fire, or high temperatures. Do not place loose batteries in a pocket, purse or other container containing metal objects, mix with used or other battery types, or store with hazardous or combustible materials. Store in cool, dry, ventilated area. Follow applicable laws and regulations for disposal.

MAINTENANCE

Clean and lubricate threads with a clean cloth and apply thin coat of silicon-based lubricant to rubber O-rings. The Centurio Design® Flashlight has threaded parts. We recommend all threaded parts with an oil which contains little water regularly collect. Please use exception cloths that has no fluff balls. Note: Do not use petroleum-based lubrication on Centurio Design O-rings. After prolonged exposure to moisture, the bezel and batteries should be removed, inspected, and dried if necessary.
